

VAN DER PLOEG INTERNATIONAL B.V.

FROM PRODUCER TO CONSUMER

CATTLE EXPORT

Van der Ploeg International BV is supplier of black & white and red & white Holstein Friesian pregnant pedigree Heifers.

The Dutch Holstein Friesian breed excels in high lifetime milk production combined with sound constitution and good adaptability to produce under various climate conditions.

TRANSPORT

Van der Ploeg International BV will ensure in close cooperation with different shipping companies, safe transport whether it be by truck, aircraft or vessel to the final destination.

DAIRY FARM PROJECTS

Van der Ploeg International BV can design and offer complete dairy farm projects according to the local climate conditions. These farms are designed to be animal friendly and easy to manage.

MANAGEMENT / TRAINING

In order to utilize the high genetic potential of your dairy cattle, good management is the key to successful dairy farming. As part of our aftersales services, we can provide interim management and training.

DUTCHLAC MILKING SYSTEMS

Good milking equipment is very important to achieve high quality milk produced under hygienic conditions. Well adjusted milking equipment is important to maintain good udder health. Therefore **Van der Ploeg International BV** developed its own milking equipment named **Dutchlac**, equipped with heavy galvanized stalling equipment, easy to handle and with low maintenance.

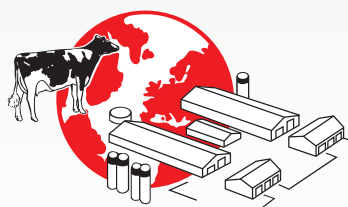

We can deliver milking parlours from a simple herringbone system to an advanced side by side rapid exit system. The milking parlours can be supplied with automatic identification system by means of leg transponders with heat detection system, automatic milk yield recording system and a sorting gate. Also a push-up gate for the waiting room is possible. All systems are integrated in a herd management computer system for easy management of the farm.

MILK PROCESSING

Maximum profit can be obtained by controlling the production and the processing of milk. We therefore extended our field of expertise to dairy processing lines. **Van der Ploeg International BV** can deliver all equipment necessary to process pasteurized milk, cream, yogurt, kefir, cheese, butter etc.. Our packing machines can take care of appropriate packing in cartons, bottles, bags or cups.
